

HA-PL5 CHARGER STATION-18

STORAGE AND CHARGING CASE FOR 18 HA-PL5 PORTABLE LIGHTS

The HA-PL5 charger station-18 is a strong protective case that is used for transportation and recharging of 18 HA-PL5 portable lights. By simply dropping the lights into the charging station, the portable lights will be charged. Charging is fast and within 8 hours. There is no need to connect the lights to cables or sockets. The intelligent charger keeps batteries of portable lights in the best condition. It is not necessary to disconnect the chargers from the grid when the batteries are fully charged. The intelligent chargers will maintain the condition and level of the batteries and drip charge when the battery level requires so. Indicator LEDs give information about the status of the condition of the batteries of the HA-PL5 portable lights.

The HA-PL5 charging station-18 provides an easy and safe storage for the portable airfield lights.
