

MARSHALLING WANDS

VISUAL AIRCRAFT COMMUNICATION

Marshalling wands are used as a visual aid for communication between groundcrew and pilot. Marshalling wands are generally used to aid aircraft ground manoeuvres at night, such as aircraft parking at the gate, turning, slowing down and shutting down engines.

Our marshalling wands are made for professional use at airports. They are lightweight and easy to handle and offer excellent visibility at night on the ramp, thanks to their bright LED illumination.

Available in Aluminium or Polymer versions. Each wand is USB rechargeable, with options for single or five bay charging stations. High quality gear, made for professional performance.

	MATERIAL	Aluminium with non-slip rubberized grip. Polycarbonate lens with scratch resistant coating. Water and impact resistant
	COLOUR	Black
	DIMENSIONS	Length, 21,36 cm
	WEIGHT	352 gr
HS CODE (CUSTOMS TARIFF)		86080000
